

Elevator pitch

Omniboost is the data platform for hospitality finance and operations, connecting PMS, POS, and accounting systems to turn fragmented data into clean, compliant financial records and trusted business insights. By aligning financial and operational information across properties, brands, and countries, we automate reporting, reduce errors, and give teams confidence in their numbers. The result is financial clarity today and a unified data foundation for smarter decisions tomorrow.

Final - 50-Word Description

Omniboost is the data platform for hospitality finance and operations. We connect PMS, POS, and accounting systems, transforming their data into clean, compliant financial records and trusted business insights. The result: automated reporting, faster reporting cycles, reduced errors, and financial clarity today, plus a unified data foundation for smarter decisions tomorrow.

Final 100-Word Description

Omniboost helps hospitality teams turn fragmented system data into a reliable source of truth for finance and operations. We connect PMS, POS, and accounting systems, transforming their data into clean, compliant financial records and trusted business insights, saving you time and reducing errors.

Beyond financials, Omniboost provides a unified data foundation, ensuring that financial and operational data stay aligned. This results in automated, faster reporting, reduced errors, deeper insights, and confident decision-making across multiple properties, brands, systems, and countries.

Final 200-Word Description

Hospitality finance relies on systems that were never designed to work together. PMS, POS, and accounting platforms speak different languages, forcing teams to manually reconcile information, fix errors, and question whether their numbers can truly be trusted.

Omniboost solves this challenge.

Omniboost is the data platform for hospitality finance and operations. We connect PMS, POS, and accounting systems, transforming fragmented information into clean, automated, and compliant financial records with complete transparency. When systems align, finance teams gain clarity, reporting becomes consistent, operational and financial performance tell the same story, and hospitality teams gain trusted business insights.

Beyond finance, Omniboost provides a unified, source-of-truth data foundation, ensuring that financial and operational data stay aligned. Our platform delivers structured, accounting-grade information that supports deeper insights, better decisions, and scalable growth across properties, brands, systems, and countries.

Omniboost doesn't replace the systems hotels use every day. We work beneath them, quietly ensuring data flows correctly, numbers reconcile, and business data remains reliable across systems. When the foundation is right, everything else works better.

Final 300-Word Description

Hospitality systems weren't designed to talk to each other. Property management systems, point-of-sale platforms, and accounting software all operate with different structures, logic, and rules. As a result, teams are left stitching together by hand, spending hours reconciling data, correcting errors, and double-checking results.

These challenges turn reporting and analysis into a daily source of stress instead of a reliable foundation for running the business.

Omniboost solves this challenge.

Omniboost is the data platform for hospitality finance and operations. We connect PMS, POS, and accounting systems, transforming fragmented information into clean, automated, and compliant financial records with full transparency. When platforms align, finance teams gain confidence in their numbers, reporting becomes consistent across properties, brands, systems, and countries, and automation becomes a relief rather than a risk.

By applying accounting and tax logic by design, we ensure financial data is ready to use, not just transferred between platforms. At the same time, operational performance remains aligned with financial outcomes, providing teams with a clear view of the business's performance.

But Omniboost goes beyond point-to-point integrations.

Our platform provides a unified data foundation: structured, accounting-grade data serves as a true single source of truth. This foundation supports not only accurate financial reporting today, but also enables deeper operational insight and better decision-making as hospitality businesses grow more complex.

Importantly, Omniboost does not replace the systems hotels rely on every day. Instead, it works beneath them, quietly ensuring data flows correctly, transforms accurately, and remains consistent and compliant.

Built with deep hospitality expertise and a focus on financial integrity, Omniboost turns fragmented data into financial clarity and trusted business insights, providing a foundation teams can rely on today and build on tomorrow.

THE OMNIBOOST 5-POINT PITCH

1. DEFINER — What Omniboost Is

Omniboost is the data platform for hospitality finance and operations, connecting PMS, POS, and accounting systems to turn fragmented data into clean, compliant financial records and trusted business insights. By aligning financial and operational information across properties, brands, and countries, we enable automated reporting and faster reporting cycles, reduce errors, and give teams confidence in their financial data. The result is financial clarity today and a unified data foundation for smarter decisions tomorrow.

2. EYE-OPENER — The Real Problem

Hospitality finance runs on systems that were never designed to work together. PMS, POS, and accounting all speak different languages, which forces finance teams to rely on manual processes, spreadsheets, and reconciliation.

That leads to:

- errors and manual rework
- slow month-end closes
- compliance risk
- unreliable business data
- uncertainty whether the numbers can truly be trusted

These challenges turn reporting and analysis into a daily source of stress instead of a reliable foundation for running the business.

3. POSITIONING PILLARS — How Omniboost Solves It

To get financial clarity and reliable business insight, hospitality teams need to:

#1 Align the core systems

By mastering the financial system's backbone - PMS, POS, and accounting - Omniboost ensures data is accurate, consistent, and finance-ready from the start.

#2 Automate with accounting logic built in

We don't just move data. We apply country-specific tax rules, mappings, and accounting logic so journals arrive clean and compliant without manual work.

#3 Build on a solid foundation

Once the core is in place, Omniboost provides a single source of truth that supports reporting, insights, and better decision-making across properties and countries.

4. REASON TO BELIEVE — Why Omniboost

Hospitality groups trust Omniboost because we focus on the hard work others skip:

- accounting-grade data, not raw exports
- global compliance by design
- one-to-many solutions that scale across portfolios
- transparent flows instead of black boxes

We don't replace the systems teams use every day—we make them work better together.

5. ACTION STEP — What Happens Next

The fastest way to see the difference is to look at your own data. Let's review how your PMS, POS, and accounting systems connect today, and how Omniboost can eliminate manual work, reduce risk, and create a unified data foundation for your business.
